

TSANGAI BUSINESS GROWTH SERIES · #01

The Business AI Scorecard

Score your business in 10 minutes. Find the one place where AI will save you the most time — before you spend a dollar on tools.

WHO IT'S FOR

Service business owners doing
\$100K–\$5M who feel busy but stuck

TIME REQUIRED

10 minutes

WHAT YOU'LL ACHIEVE

A score out of 50 and your #1 AI
opportunity, identified today

EXECUTIVE SUMMARY

You can't fix what you haven't measured.

This scorecard rates five areas of your business for AI readiness. In 10 minutes you'll know your score, your weakest area, and the first thing to fix.

Most owners ask me "which AI tool should I buy?" That's the wrong first question. The right one is "where is my business leaking the most hours?" Score yourself honestly below. Your lowest number is your biggest opportunity — and it's usually not where you think.

— Ray, TsangAI Consulting

WHY THIS MATTERS

21 hrs

Average hours per week owners spend on admin work AI could handle

80%

Of AI tool purchases go unused because they solve the wrong problem

1 area

Fixing your single lowest score beats dabbling in all five

THE ONE IDEA

Diagnose first. Automate second.

AI works best when you point it at one clear bottleneck. When you skip the diagnosis, you buy tools that collect dust. When you score first, every dollar and hour you invest lands where it matters.

Example: A landscaping company owner was sure he needed AI marketing. His scorecard said otherwise — quoting was his lowest score. One AI quoting assistant later, he cut quote time from 45 minutes to 8, and closed 30% more jobs simply by replying first.

YOUR 10-MINUTE QUICK WIN

- ☐ Turn to the scorecard on page 4
- ☐ Rate each of the 10 statements from 0 to 5 — gut answers are fine
- ☐ Add up your total and circle your lowest section
- ☐ Read what your score means on page 3 — that's your starting point

Five steps from score to first win

1 Take the scorecard

Rate all 10 statements on page 4. Don't overthink — your first instinct is usually right.

Do this: Print page 4 or write scores on your phone. Total them up.

2 Find your lowest section

Each pair of statements covers one area: Time, Marketing, Sales, Operations, and AI Basics. Your lowest pair is your bottleneck.

Do this: Circle the section with the lowest combined score.

3 Name the single worst task

Inside that section, pick the one task that eats the most hours or loses the most money each week.

Do this: Write one sentence: "Every week I lose ____ hours to ____."

4 Run the AI analysis prompt

Paste the prompt on page 4 into ChatGPT or Claude along with your scores. It will suggest your first automation, step by step.

Do this: Copy, paste, fill in the blanks, hit enter.

5 Block 30 minutes this week

Knowledge without a calendar slot changes nothing. Book time to try the first suggestion while it's fresh.

Do this: Open your calendar now and book "AI Fix #1" this week.

COMMON MISTAKES

This is where most business owners get stuck.

They score every area a 4 because honesty stings. They try to fix all five areas at once. Or they buy a tool before naming the problem. Score low, pick one, fix one.

PRO TIP

Re-take this scorecard on the first Monday of every month. A rising score is the cleanest proof your AI investments are actually working — and a flat score tells you to change course before you waste another quarter.

Rate each statement: 0 = never true, 5 = always true

AREA	STATEMENT	SCORE /5
Time	I spend less than 5 hours a week on repetitive admin (email, scheduling, data entry).	___
	My business runs for a full week without me touching daily operations.	___
Marketing	We publish consistent content every week without me writing it all myself.	___
	New leads arrive weekly from systems, not just referrals and luck.	___
Sales	Every lead gets a reply within 1 hour, even nights and weekends.	___
	Quotes and proposals go out the same day they're requested.	___
Operations	Our core processes are written down where the team can find them.	___
	New clients are onboarded by a checklist or system, not by memory.	___
AI Basics	My team and I use an AI assistant (ChatGPT, Claude) most working days.	___
	At least one business process is fully automated end to end.	___

What your total means

- ✓ **0–15 — Manual Mode.** Huge upside. Start with one fix.
- ✓ **16–30 — Getting There.** Pick your lowest area and go deep.
- ✓ **31–42 — Systemized.** Time to automate, not just organize.
- ✓ **43–50 — AI-Powered.** You're ahead. Now scale it.

The AI Analysis Prompt

You are an AI operations consultant for small service businesses. My business: **[WHAT YOU DO]**. My scorecard: Time **[X]/10**, Marketing **[X]/10**, Sales **[X]/10**, Operations **[X]/10**, AI Basics **[X]/10**. My worst task: **[TASK]**, which costs me **[HOURS]** hours a week. Suggest the single best automation to start with, the simplest tool for it, and a step-by-step setup plan a beginner can follow this week.

Turn this guide into one win this week.

A guide you read changes nothing. A page you fill in does. Two minutes — do it while it's fresh.

1 • WHERE I AM TODAY

My scorecard total: _____ / 50 My weakest area: _____

2 • THE ONE THING I'M FIXING THIS WEEK

My one fix: _____

The first small step (under 15 minutes): _____

Small beats big. Pick something you can finish in one sitting.

3 • WHEN I'M DOING IT

Day: _____ Time: _____ Booked in my calendar? ☐

Open your calendar and book it now — a plan without a time slot is a wish.

4 • AFTER — WHAT HAPPENED

My result (hours saved, jobs booked, thing shipped): _____

What I'll do differently next time: _____

NOTES

KEEP THE STREAK

One fix a week is 52 upgrades a year. When this page is full, re-take the guide — a rising score is proof your systems are working.
