

TSANGAI BUSINESS GROWTH SERIES · #10

The Lead Follow-Up Blueprint

The 5-touch sequence that turns "we'll think about it" into booked jobs — with AI writing every message, so no lead ever goes cold again.

WHO IT'S FOR

Businesses paying for leads, then losing them in a busy inbox

TIME REQUIRED

15 minutes

WHAT YOU'LL ACHIEVE

A complete 5-touch follow-up sequence, personalized to your business, installed today

EXECUTIVE SUMMARY

You don't have a leads problem. You have a follow-up problem.

Most sales are lost between touch one and touch two — because touch two never happens. This blueprint installs a 5-touch sequence that runs on templates, not memory.

I've watched owners spend thousands on ads, then leave the leads sitting overnight because a job ran long. The brutal truth: the fastest responder wins the job more often than the best business does. Speed is a system. Persistence is a system. Both are on the next three pages.

— Ray, TsangAI Consulting

WHY THIS MATTERS

1 hour

Reply inside the first hour and you're many times more likely to win the job

5 touches

Most buyers need multiple contacts — most businesses stop after one

\$0

Extra ad spend required — follow-up converts leads you already paid for

THE ONE IDEA

Speed wins the lead. Persistence wins the sale.

Two moves, both automatable: reply within minutes while the lead is still looking at your website, then keep showing up — helpfully, not desperately — until they decide. Silence isn't a no. It's a busy person.

Example: A fencing company replied to quotes "when we got to them" — usually next day. They installed an instant auto-reply plus the 5-touch sequence. Same leads, same ad budget: booked jobs up by a third in the first month.

YOUR 10-MINUTE QUICK WIN

- ☐ Count last month's leads and how many you followed up more than once
- ☐ Copy Touch 1 (the instant reply) from page 4 into your email or CRM
- ☐ Turn it on for every new enquiry — auto-reply or saved snippet
- ☐ Message your 3 most recent "gone quiet" leads with Touch 4 today

Five steps to never losing a warm lead

1 Find your real response time

Send a test enquiry through your own website form right now. Time how long until a human replies. That number is your baseline — and probably your biggest leak.

Do this: Submit your own form. Write down the hours (be honest).

2 Install the instant reply (Touch 1)

Every new lead gets a friendly, useful reply within minutes — confirming you got their message and telling them exactly what happens next.

Do this: Set the Touch 1 template as an auto-reply on your form, or a one-click snippet on your phone.

3 Load the full 5-touch sequence

Touches 2–5 are on page 4: value, proof, a nudge, and a polite breakup. Personalize each once with AI, then save them as templates.

Do this: Run the Personalizer Prompt on page 4, paste results into your email templates or CRM.

4 Put the sequence on rails

Follow-up dies when it depends on memory. Use CRM reminders at minimum — or automate the sends with your CRM, Zapier, or n8n so touches go out on schedule unless the lead replies.

Do this: Set the schedule: Touch 1 instant, 2 on day 2, 3 on day 5, 4 on day 9, 5 on day 14.

5 Track one number weekly

Leads in vs. jobs booked. That's your conversion rate. Watch it move as the sequence does its work — and stop guessing whether marketing "is working."

Do this: Add a two-column tally to your Friday routine: leads this week, booked this week.

COMMON MISTAKES

This is where most business owners get stuck.

They quit after one follow-up because "I don't want to be pushy" — while the buyer simply forgot. They send "just checking in" messages that add zero value. And they follow up from memory, which means only when it's quiet.

PRO TIP

The breakup message (Touch 5) gets the most replies of the whole sequence. "Should I close your file?" forces a decision — and buyers who were stalling suddenly find their wallet. Never skip it.

The 5-touch sequence — steal every word

Touch 1 · Instant reply (0–5 min)

Hi [NAME] – thanks for reaching out about [SERVICE]! I got your message and will get back to you with details by [TIME] today. If it's urgent, call or text [PHONE]. – [YOUR NAME]

Touch 4 · The easy nudge (day 9)

Hi [NAME] – I know things get busy. If you're still thinking about [SERVICE], just reply with a number: 1 = ready to book, 2 = have a question, 3 = need more time. Takes two seconds.

Touch 2 · The value follow-up (day 2)

Hi [NAME], following up on your [SERVICE] enquiry. Quick thing worth knowing: [ONE USEFUL TIP OR ANSWER TO A COMMON QUESTION]. Happy to walk you through your options – does [DAY/TIME] work for a quick call?

Touch 5 · The breakup (day 14)

Hi [NAME] – I don't want to clutter your inbox, so this is my last note. Should I close your file for [SERVICE]? If timing's just off, no problem – tell me when to check back and I'll set a reminder. Either way, thanks for considering us.

Touch 3 · The proof (day 5)

Hi [NAME] – we just wrapped a [SIMILAR JOB] for a client in [AREA]: [ONE-LINE RESULT]. Here's what they said: "[SHORT REVIEW QUOTE]". Want me to put together the same plan for you?

The Personalizer Prompt

You are a sales copywriter for local service businesses. My business: [WHAT YOU DO] in [AREA]. Tone: friendly, brief, zero pressure. Rewrite the 5-touch follow-up sequence I paste below so it sounds like us. Keep each under 80 words, keep the schedule labels, and make Touch 2's tip specific to [SERVICE]: [PASTE THE 5 TOUCHES]

Turn this guide into one win this week.

A guide you read changes nothing. A page you fill in does. Two minutes — do it while it's fresh.

1 • WHERE I AM TODAY

My test response time: _____

Touch 1 live? ☐

2 • THE ONE THING I'M FIXING THIS WEEK

My one fix: _____

The first small step (under 15 minutes): _____

Small beats big. Pick something you can finish in one sitting.

3 • WHEN I'M DOING IT

Day: _____ Time: _____ Booked in my calendar? ☐

Open your calendar and book it now — a plan without a time slot is a wish.

4 • AFTER — WHAT HAPPENED

My result (hours saved, jobs booked, thing shipped): _____

What I'll do differently next time: _____

NOTES

KEEP THE STREAK

One fix a week is 52 upgrades a year. When this page is full, re-take the guide — a rising score is proof your systems are working.
