

TSANGAI BUSINESS GROWTH SERIES · #15

The Content Engine

Turn one 5-minute voice memo into a week of posts and an email — a marketing system that runs on talking, not typing.

WHO IT'S FOR

Owners who know they should post
but haven't in three weeks

TIME REQUIRED

15 minutes

WHAT YOU'LL ACHIEVE

Three posts drafted from one voice
memo — today, in your own words

EXECUTIVE SUMMARY

You already say marketing gold every day. You just don't write it down.

Every client question you answer is a post. This engine captures what you already say in a voice memo, and AI turns it into a week of content that sounds like you — because it started as you.

Owners tell me "I'm not a writer." Perfect — this system doesn't need one. You explain things to customers all day: why quotes vary, what to check before buying, the mistake you saw on Tuesday. Talk that into your phone for five minutes. That's the raw material. AI does the typing; you keep the voice.

— Ray, TsangAI Consulting

WHY THIS MATTERS

5 min

One voice memo — the entire weekly time cost of this system

1 → 5+

Each memo becomes posts, an email, and replies to common questions

Wk after wk

Consistency beats brilliance — showing up weekly is what builds trust

THE ONE IDEA

Record once. Repurpose everywhere.

The hard part of content was never ideas — it's the blank page. Kill the blank page by starting from speech. Answer one real customer question out loud, and the transcript becomes the week's content in every format.

Example: A pool service owner recorded himself answering "why is my pool green even though I shock it?" — 4 minutes in the truck. AI turned it into a Facebook post, two short LinkedIn posts, and a customer email. That one memo brought in three service calls the same week.

YOUR 10-MINUTE QUICK WIN

- ☐ Pick one question a customer asked you this week
- ☐ Record a 3–5 minute voice memo answering it like you would face to face
- ☐ Transcribe it (your notetaker, phone dictation, or paste audio into AI)
- ☐ Run the Repurpose Prompt on page 4 — read your three drafted posts

Five steps to a weekly engine

1 Build your question bank

List the ten questions customers ask you most. This is a year of content topics — real ones, proven by the fact that people literally ask.

Do this: Steal the starters on page 4, add your own, keep the list in your notes app.

2 Record your weekly memo

Same slot every week — Monday drive, Friday coffee. One question from the bank, answered out loud with a story or example if you have one.

Do this: Put a 10-minute "record memo" block in your calendar, recurring weekly.

3 Run the Repurpose Prompt

Transcript in, content out: posts for your platforms, an email for your list, all in your words with your examples kept intact.

Do this: Paste transcript + prompt from page 4. Edit each draft for 60 seconds max.

4 Schedule the week in one sitting

Batch it: load the posts into your platforms or a free scheduler (Buffer, Later, Meta's own tools) and walk away. Posting daily doesn't mean logging in daily.

Do this: Schedule 3 posts across the week, plus the email if you have a list.

5 Reply and reuse

Comments and DMs tell you what landed — and every reply you write is next week's memo topic. The engine feeds itself.

Do this: Check comments in your email windows (guide #14). Add any new question to the bank.

COMMON MISTAKES

This is where most business owners get stuck.

They post generic AI content with the personality of a manual — starting from a transcript keeps YOUR stories and phrases. They chase five platforms and burn out; one done weekly beats five done once. And they quit at week three, right before familiarity starts compounding.

PRO TIP

End posts with a question, not a pitch. "What's the worst [problem] you've seen?" earns comments; comments earn reach; reach earns enquiries. The algorithm rewards conversation — and every comment is market research you didn't pay for.

The prompt, the question bank, the weekly rhythm

The Repurpose Prompt

You are my content editor. My business: **[WHAT YOU DO]** serving **[WHO]** in **[AREA]**. Below is a transcript of me answering a customer question. Keep my phrases, stories, and examples – do not make it sound corporate. Create: 1) a Facebook/LinkedIn post (120–180 words) with a hook first line and a question at the end, 2) two short posts (under 50 words each) pulling the two best single points, 3) a friendly email to my list (under 150 words) with subject line options. Grade 6 reading level. Transcript: **[PASTE TRANSCRIPT]**

Question Bank Starters

- ✓ What does [service] actually cost — and why does it vary?
- ✓ What's the #1 mistake people make before calling us?
- ✓ How do you choose between [option A] and [option B]?
- ✓ What should you check before hiring anyone in our trade?
- ✓ What surprised this week's customer most?
- ✓ What's a job we fixed that someone else got wrong?
- ✓ When is the RIGHT time of year to do [service]?
- ✓ What can you DIY — and what really shouldn't be?

The Weekly Rhythm ~35 min total

DAY	ACTION	MINS
Mon	Record the memo (one bank question)	5
Mon	Transcribe + run Repurpose Prompt	10
Mon	Edit drafts, schedule the week	15
Daily	Reply to comments (in email windows)	5
Fri	Add new questions to the bank	2

NO LIST YET?

Skip the email for now — but start collecting addresses today. Your lead magnets (like this series) are exactly what people trade an email for.

Turn this guide into one win this week.

A guide you read changes nothing. A page you fill in does. Two minutes — do it while it's fresh.

1 · WHERE I AM TODAY

My weekly memo slot: _____

First memo recorded? ☐

2 · THE ONE THING I'M FIXING THIS WEEK

My one fix: _____

The first small step (under 15 minutes): _____

Small beats big. Pick something you can finish in one sitting.

3 · WHEN I'M DOING IT

Day: _____ Time: _____ Booked in my calendar? ☐

Open your calendar and book it now — a plan without a time slot is a wish.

4 · AFTER — WHAT HAPPENED

My result (hours saved, jobs booked, thing shipped): _____

What I'll do differently next time: _____

NOTES

KEEP THE STREAK

One fix a week is 52 upgrades a year. When this page is full, re-take the guide — a rising score is proof your systems are working.
